ePROmeasure
Measure, Inform, Enable →

Manage your **Study** with ePROmeasure!

Electronic Patient-Reported Outcomes research study design, recruitment, survey administration, data collection, scoring and reporting.
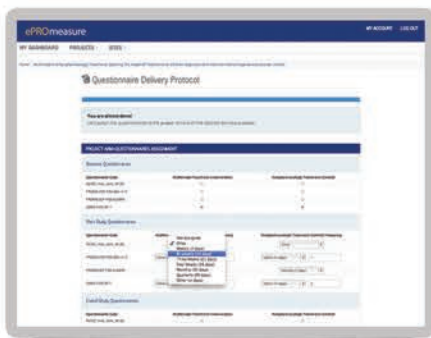

Measure
Measuring made easy with ePROs

Easily administer and score ePROs through use of our extensive library of PROs, including IRT/CAT measures, and modifiable delivery schedules. Our fully licensed library features PROMIS, FACT/FACIT, RAND, and DSM-5* measures. * (License pending)
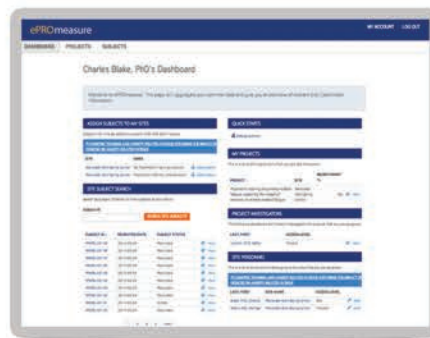

Inform
Knowing your study's status, quickly.

Readily and easily be informed on how your study is doing through automatic: questionnaire delivery tracking, subject recruitment tracking, recruitment performance, subject status, and data management.

Enable
Enabling decisions and management.

Harness the benefits of ePROs and facilitate study management by leveraging the user-friendly ePROmeasure dashboard and project set-up wizard. Designed to make ePRO administration and study management simple so you have the power to easily manage your study.

ePROmeasure

Manage your **ePRO** Study with ePROmeasure!

ePROmeasure makes Patient-Reported Outcomes research easy with intuitive study design, recruitment, survey administration, data collection, scoring and reporting capabilities

A Full-Featured Platform to Manage Your Outcomes Research Study

ePROmeasure provides portals for study personnel and subjects. The user experience is optimized according to the user's access level, which includes account administrators, project investigators, site coordinators, providers, and patients/subjects. The portal's interface utilizes a responsive design to cost-effectively extend the ePROmeasure experience to all devices, regardless of screen size or operating system preference – e.g. desktop, laptop, tablet, smartphones; iOS, Android, Windows.

Unlike the competition, ePROmeasure goes beyond simple Electronic Data Capture (EDC) or paper-to-digital PRO transcription services. The ePROmeasure platform is unique in that it can fully support the most cutting edge IRT/CAT instruments, including the adaptive Item Banks from the NIH PROMIS project. Our bespoke ePROmeasure instrument library includes hundreds of the most sought after validated PRO instruments being used today. We hand-coded and then rigorously tested each instrument to ensure the accuracy each instrument and its scoring logic. If you cannot find a desired validated instrument, let us know and we'll complete the electronic transcription for you – free of charge.

Study Management

ePROmeasure offers a key suite of features that are designed to facilitate the management of your ePRO study, including: an easy-to-use project set-up wizard; the ability to add/edit study parameters, personnel, and subjects; a customizable ePRO administration protocol; subject adherence and recruitment tracking; cumulative enrollment and questionnaire usage reports; and data exporting. Finally, ePROmeasure accounts have permissions- settings, which provide study personnel with information that is relevant to their "access level."

ePRO Survey Instrument Library & Usage Liceneses

The instrument library includes public domain and proprietary instruments. The majority of the instruments in our library can be selected and used immediately in your study and/or clinical practice without additional costs. For the others, we will assist you in obtaining appropriate licenses from the instrument licensors, which could involve additional license fees to the licensors.
